## Projects

### 1) My7Quotes – Flutter Quote App

*Quote-sharing mobile app with export & offline features*

- Developed with Flutter, integrated Firebase Firestore for live data and Hive for offline support
- Features include swipe-to-view quotes, background music, and image export with UI overlay
- Applied clean architecture and modular design for maintainable codebase

### 2) BookStore – Full Stack Web Application (PHP + MySQL)

*Online bookstore with cart and user login system*

- Built responsive UI with Bootstrap and developed server-side logic using PHP
- Implemented user authentication, product listing, and admin panel
- Managed backend with phpMyAdmin and raw SQL for database operations

### 3) Portfolio Website – Personal Web Profile

*Responsive single-page developer portfolio*

- Created using HTML, CSS, Bootstrap, and JavaScript
- Deployed via GitHub Pages with working contact form (Formsubmit)
- Optimized for performance and mobile responsiveness

### 4) Spotify Clone – Static Frontend

*Landing page redesign using HTML & CSS*

- Recreated Spotify's homepage layout with pixel-perfect accuracy
- Designed for practice in responsive layout and front-end structure

### 5) Amazon Clone – Static Frontend

*HTML/CSS replica of Amazon homepage*

- Built using only HTML and CSS, focused on layout structure and responsive elements
